## **DETAILED ACTION**

### ***Response to Remarks***

1. This is in response to the Remarks received on October 3, 2002. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.
2. Claims 19-37 are currently pending in this application.
3. Applicant's arguments filed October 3, 2002 have been fully considered but they are not persuasive.

Throughout the Remarks, Applicant emphasizes that the ferromagnetic core of Larson goes not generate a magnetic field because it is not a permanent magnet. However, in contrast to Applicant's allegation, it has been known that a ferromagnet would be able to generate a magnetic field.

In response to Applicant's argument that Larson's invention only disclose a magnetic fields varying in direction or amplitude, but not both, it must be recognized that when the amplitudes of two magnetic fields are changed, the resultant magnetic field would be changed, not only in magnitude, but also in direction. And vice versa with a change in direction of two magnetic fields: as the directions of two magnetic fields are varied, the amplitudes of the two magnetic fields would also be varied.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1711

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
